The Client
C/O- Wellington & Reeves
197 York Street
ALBANY WA 6330

To whom it may concern,

RE: Rental Estimate – 8 Gerdes Way, McKail WA 6330

As part of the services Wellington & Reeves provides to our clients, we have completed a rental estimate for the above property.

The property has several features that are likely to appeal to prospective tenants, including:

- Modern four bedroom, two bathroom home with spacious open plan living and a separate front lounge
- Low maintenance 699sqm block with a family friendly backyard and easy outdoor living
- Master suite and front lounge can be separated from the main living area, with a separate family wing for added privacy
- Solar panels, double garage, modern kitchen and convenient access to nearby parks, schools, shops and Albany CBD

Based on the property's location, condition, presentation and features, along with a comparison to similar properties in the current rental market, we estimate the property could achieve a rental return of $800.00 to $850.00 per week.

This estimate is based on current market conditions and should be used as a guide. The final rental price achieved will depend on factors such as market demand, the time of year and the property's presentation when advertised.

Rental demand changes throughout the year and can affect the rent achieved. Our goal is to secure the best possible rental price while attracting quality tenants.

Before a tenancy can begin, all residential rental properties must meet the required safety standards, including smoke alarms, RCDs, security and blind cord safety. We are happy to assist you in ensuring your property complies with these requirements.

If you have any questions about this rental estimate or any other real estate matter, please feel free to contact me on 9841 1455.

Yours sincerely,

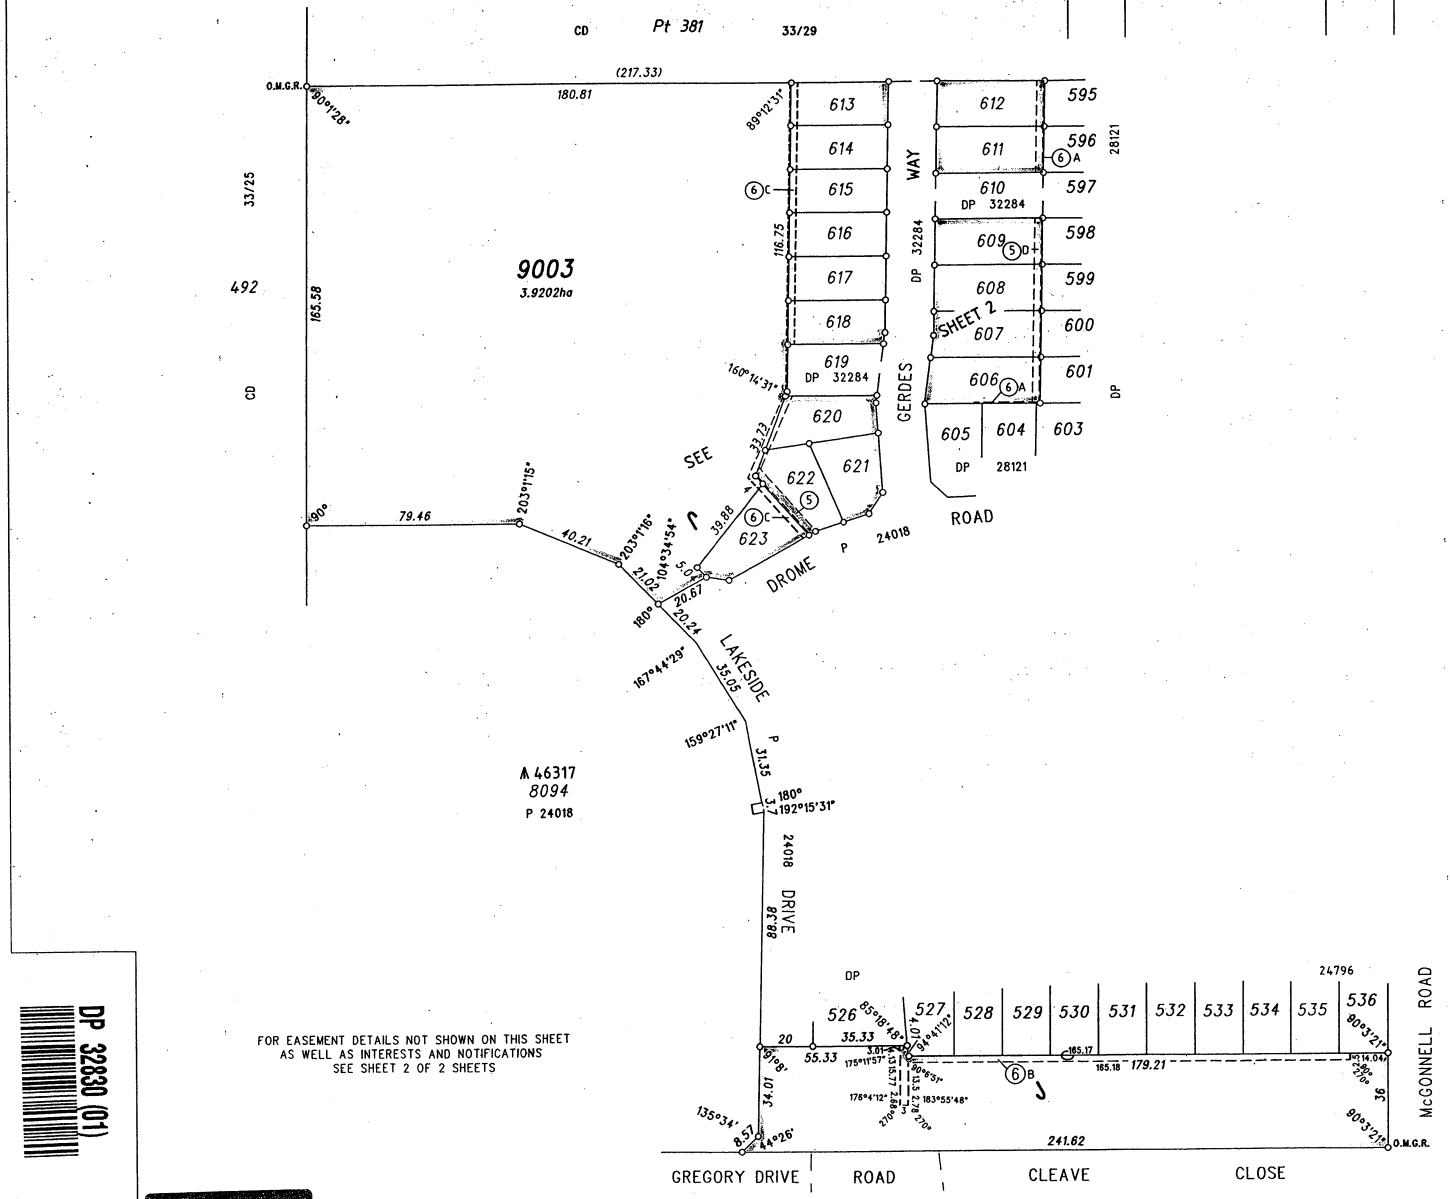

Zoe Toovey
Property Manager

Please note, as per our Professional Indemnity Policy, we must state the following: The statements have been prepared solely for the information of the client and not for any third party. Although every care has been taken to arrive at this figure, we stress that it is an opinion only and not to be taken as a sworn valuation. We must also emphasize that we shall not be held responsible should the statements or any part thereof be incorrect or incomplete in any way. This estimate is deemed valid for 30 days from the date completed, or such earlier date if we become aware of any factors that have any effect on the property value.

The range of salinity of natural water is:

Category	Salinity range
Fresh	0-500 mg/L TDS (suitable for selected agricultural use)
Marginal	500-1000 mg/L TDS (suitable for selected agricultural use)
Brackish	1000-3000 mg/L TDS (used for parkland irrigation)

Saline 3000-35,000 mg/L TDS (industrial use and stock watering up to 10,000mg/L)

Details are as follows:
Mosquito-borne Disease Risk:
Risk Level - Low or unknown risk

Occasional very high risk
The selected area is in a region that experiences severe problems with nuisance and disease carrying mosquitoes in some years, depending on environmental conditions.

Frequent high and occasional very high risk
The selected area is in a region that frequently experiences problems with nuisance and disease carrying mosquitoes, and severe issues are also experienced in some years depending on environmental conditions.

Low or unknown risk
This location has not experienced high rates of mosquito-borne disease in the past. However, the sporadic nature of mosquito-borne disease outbreaks means that this not necessarily a precise indicator of future risk. Furthermore, regions with low or no resident human population may also be classified as low risk even though there may be an undocumented high risk in the area. Finally, significant mosquito nuisance issues may still be experienced, despite a low health risk.

Residents are advised to avoid exposure to mosquitoes and minimise mosquito

breeding around the home as appropriate, particularly following extreme weather events such as heavy rainfall, high tides (in coastal areas) or localised flooding that may create abnormally large areas of mosquito breeding habitat.

For information on mosquito control in your local area or to report a mosquito problem please contact your Local Government Environmental Health Officer.

For more information about mosquito management, contact the Environmental Health Directorate on (08) 9388 4999 or email medical.entomology@health.wa.gov.au or see http://ww2.health.wa.gov.au/Articles/J_M/Mosquito-management.

Definition of Interest:
Residual Current Devices (RCDs) monitor the flow of electricity from the main switchboard and prevent electrocution by cutting the electricity supply if an

imbalance in the current is detected. At least two RCDs must be fitted before land title is transferred.

Affect of Interest:
All home sellers and landlords must ensure that RCDs are installed in accordance with the Electricity Regulations to protect all power points and lighting circuits.
RCDs cut the electricity supply instantly if a person touches a live part and receives a shock. By installing two or more RCDs, the property's circuits can be divided evenly between then, ensuring some light and power remains if one RCD operates. Multiple RCDs also avoid nuisance operation caused by appliances with low-level leakage currents. All properties constructed after 2000 should already have two RCDs fitted.
Two RCDs must be fitted to protect all power points and lighting circuits in all homes before the land title is transferred. If you are planning to sell your home and it does not already have two RCDs protecting all power point and lighting circuits, you will need to engage a licensed electrical contractor to install them to comply with the Electricity Regulations.
Landlords must ensure RCDs are installed in accordance with the Electricity Regulations. If RCDs are not fitted, tenants should contact the managing agent or landlord and request that RCDs be installed as required.
